FastTrack Onboarding NIS2

WHY FAST TRACK?

The NIS2 Directive aims to enhance cybersecurity across the EU by introducing stricter requirements for security, incident reporting, and risk management. Our FastTrack solution helps you quickly establish structure, understand legal requirements, and take the first step toward compliance — with minimal strain on internal resources.

YOUR BENEFITS – IN SHORT

- **Time savings**: Get started quickly in preparation for upcoming supervisory reviews.

- **Efficiency**: Automated support for control monitoring, policy and framework implementation, and streamlined evidence collection — all designed to reduce workload and ensure NIS2 compliance.

- **Trust**: Real-time reporting and visibility into your organization's compliance status, making it easier to stay up to date and transparent with stakeholders.

- **Transparency & sustainability**: Security report with actionable recommendations.

- **Training and awareness**: We offer training programs to raise awareness of NIS2 requirements and security practices within the organization.

- **Tailored advisory**: Customized guidance and support to ensure your organization meets specific NIS2 requirements and adapts to regulatory changes.

RESULTS

- Facilitates compliance with NIS2 Directive requirements

- Clear action recommendations for sustainable information security

- Increased trust from customers and partners
